

Corey Kogan Kogan

SOFTWARE ENGINEER | FULL STACK, REACT & CLOUD SYSTEMS

coreykogan@gmail.com • 609-339-8427 • github.com/kogan007 • coreykogan.dev • linkedin.com/in/corey-kogan

Full-stack software engineer with experience building scalable web applications and internal platforms across ecommerce and AI-driven industries. Specialized in React, TypeScript, and cloud-based architectures with a strong focus on performance, maintainability, and user experience. Experienced collaborating cross-functionally to deliver high-impact features, scalable frontend systems, and modern developer workflows across fast-paced product teams.

EXPERIENCE

Compscience, Remote

Nov 2024 - Present

Frontend Software Engineer

Built and maintained internal and client-facing applications for an AI-driven insurance platform supporting underwriting and inspection workflows.

- Developed scalable web applications using React, Redux, TypeScript, and AWS services.
- Built and maintained underwriting and inspection workflows used by internal teams and enterprise clients.
- Collaborated closely with backend and product teams to deliver performant, data-heavy user interfaces.
- Improved frontend maintainability through reusable component patterns and scalable state management architecture.
- Contributed to application performance optimization and responsive user experiences across complex workflows.

Rhone Apparel, Stamford, CT

Mar 2023 - Oct 2024

Web Developer

Worked on high-traffic ecommerce experiences using headless Shopify architecture and Vue.js.

- Built and maintained headless ecommerce experiences using Vue.js, Shopify, and Cloudflare Workers.
- Rebuilt category browsing experiences with infinite scrolling, filtering, and sorting optimizations.
- Improved frontend performance, page responsiveness, and overall user experience across product and collection pages.
- Collaborated on modernized product detail page experiences focused on mobile usability and conversion optimization.
- Contributed to deployment workflows and edge-rendering strategies using Cloudflare infrastructure.

MakDigitalDesign, Burlington, NJ

Jun 2019 - Feb 2023

Full Stack Web Developer

Developed headless ecommerce platforms and custom web applications for B2B and B2C businesses.

- Built headless ecommerce storefronts using React, Next.js, Remix, Gatsby.js, and BigCommerce.
- Developed reusable frontend components and full-stack features for custom ecommerce implementations.
- Integrated APIs, backend services, and cloud infrastructure to support scalable web applications.
- Worked across multiple client projects simultaneously in agile development environments.
- Mentored junior developers and contributed to technical problem solving across the engineering team.

SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS/SCSS

Frontend: React, React Native, Next.js, Remix, Redux, Vue.js, Tailwind CSS

Backend & APIs: Node.js, Express.js, TRPC, REST APIs, GraphQL, Serverless Architectures

Cloud & Infrastructure: AWS, Cloudflare Workers, CI/CD, Edge Deployments

Architecture & Concepts: State Management, Performance Optimization, Responsive Design, Scalable Frontend Architecture, Realtime Systems, Agile/Scrum, OOP, Functional Programming

Ecommerce & CMS: Shopify, Bigcommerce, Hydrogen
